## **Teaching Award**

Innovative Teaching Award, Honorable Mention, Decision Sciences Institute, 1992.

## **Innovative Approaches to Teaching**

- Co-developed an online asynchronous course, which is an online version of the course required for all Rutgers School of Business-Camden undergraduate students called *IT and Project Management*, August, 2020.
- Co-creator of HyperCase 2.9 (2014), software designed and developed with R. J. Barnes, R. L. Baskerville, J. E. Kendall, and (later) A. Schmidt. It is hypertext-based software that allows students to experience an organization on the Web. HyperCase is an approach that has advantages over conventional cases and role-playing. Because it is interactive and highly graphical, HyperCase is similar to an adventure game.
